**DETAILED ACTION*****Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 8 has been renumbered 7. Misnumbered claim 9 has been renumbered 8. Misnumbered claim 10 has been renumbered 9. Misnumbered claim 11 has been renumbered 10. Misnumbered claim 12 has been renumbered 11. Misnumbered claim 13 has been renumbered 12. Misnumbered claim 14 has been renumbered 13. Misnumbered claim 15 has been renumbered 14. Misnumbered claim 16 has been renumbered 15.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of copending Application No. 10/104,185. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications disclose passing a hydrocarbonaceous feedstock to a first hydroprocessing zone; passing the resulting effluent directly to a hot, high pressure separator wherein the effluent is contacted with a hot, hydrogen rich stripping gas to produce a vapor stream and a liquid stream; passing a condensed vapor stream into a bed of hydrotreating catalyst where it is contacted countercurrently with hydrogen while the liquid stream is passed to fractionation; passing the overhead vapor stream from the hot/hydrogen stripper/reactor to a cold high pressure separator and passing naphtha and middle distillates to fractionation; passing the liquid stream from the hot hydrogen stripper reactor to a second hydroprocessing zone; and passing the overhead from the cold high pressure separator to an adsorber where hydrogen sulfide is removed before hydrogen is compressed and recycled to hydroprocessing vessels within the loop.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize hydrocarbons boiling in the range from 500 F to 1500 F because the 10/104,185 reference claims hydrocarbons boiling above 392 F. It would have been obvious to one having ordinary skill in the art at the time the invention was made to maintain the second hydroprocessing zone at the same pressure as the first hydroprocessing zone to maintain system stability.

Art Unit: 1764

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
